

# Plenoptika Lunch Webinar

## Scaling up your global vision care using QuickSee

**October 16th, 12:45-1:15 pm (US CST)**

Find out how QuickSee has been used by eye care providers in 45 countries to expand their vision care outreach and highlights of the clinical results from recent publications.

QuickSee combines open view binocular design, wavefront aberrometry, and dynamic measurements to produce clinically accurate autorefractive measurements, in a durable handheld format suitable for use in clinics and in the field.
